

VISWA LAB

# STABILITY / COMPATIBILITY TEST KIT

The Viswa Stability/Compatibility is a very useful tool for the onboard staff. The test method is carried out as per the ASTM standard. The test kit is used to carry out both for predicting the stability of the residual fuel oil and evaluating the compatibility of residual fuel oil with another fuel (Residual fuel, Distillate fuel or other blend stock).

## FEATURES & BENEFITS

- Small and compact
- Easy to use
- Completely portable
- Specifically designed for onboard use
- Identify possible problems before mixing two fuels
- Helps in prevention of onboard problems such as excess sludging and fuel system problems

## TEST KIT CONSISTS OF

- Compact and Portable carry case
- Magnetic stirrer with LCD display, spill proof flask holder
- 110-220 volts supply
- Filter paper – 100 pieces
- Filter paper handling tweezer
- Teflon coated magnetic stir bar
- Conical Flask 100 ml
- Syringes
- Filter paper dryer holder
- Stability/Compatibility test spot reference chart
- Instruction Manual
